Canis Majoris (largest star discovered in our galaxy)

- 3600 times the diameter of the sun
- If the earth were a golf ball, Canis Majoris = height of Mt. Everest
- it would take a passenger jet 1100 years to circle this star one time

"If you don't see the greatness of God then all the things that money can buy become very exciting. If you can't see the sun you will be impressed with a street light. If you've never felt thunder and lightning you'll be impressed with fireworks. And if you turn your back on the greatness and majesty of God you'll fall in love with a world of shadows and short-lived pleasures." – John Piper

"Is anything too hard for the Lord?..." – Genesis 18:14
